

Roke Intelligence as a Service

Putting people at the centre of data-driven decision support

Introducing our transformative Roke Intelligence as a Service (RlaaS) offering, designed to empower businesses with faster, more comprehensive, and actionable intelligence insights.

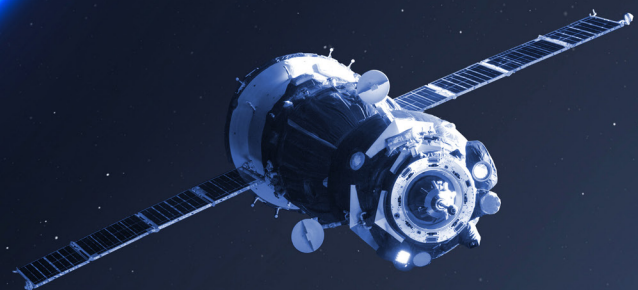

Transforming intelligence tradecraft

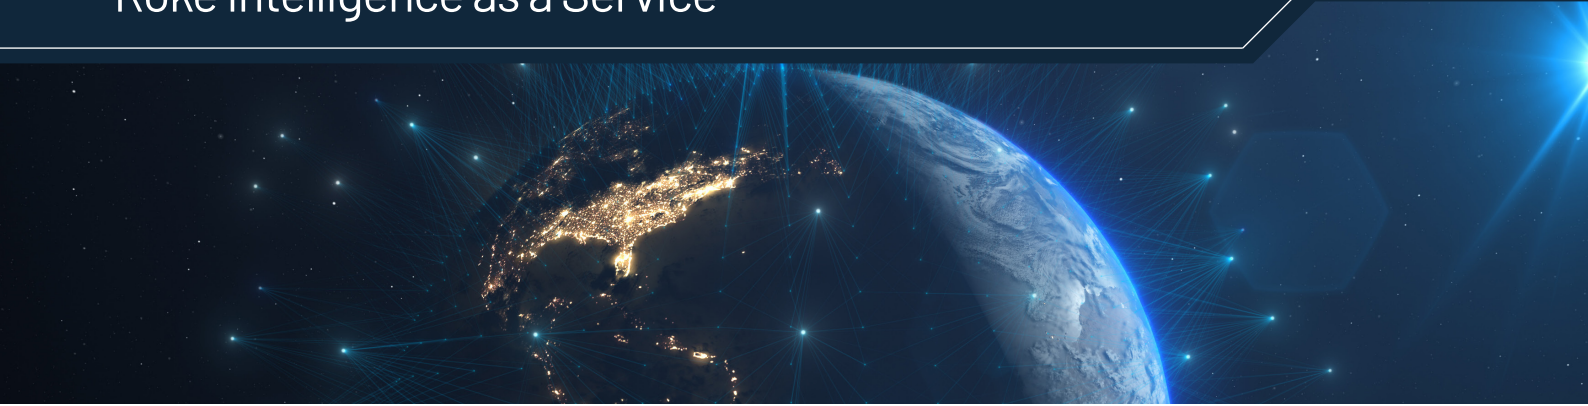

Our unique approach combines human expertise with advanced technology, harnessing the power of AI, machine learning, and cutting-edge sensor technology. With advanced data analysis techniques and customised solutions, we uncover hidden patterns and trends, providing you with the intelligence advantage you need to make informed decisions.

Key Benefits

- Accelerated Decision-Making
- Actionable Intelligence
- Uncover Hidden Opportunities
- Enhanced Threat Management
- Tailored to Your Needs

Unlock the power of intelligence with RlaaS and gain a competitive edge in today's data-driven world. Contact us today to learn more about our Intelligence as a Service and embark on a journey towards actionable insights and informed decision-making.

Features & Benefits

Physical & Digital

We combine the expertise of our highly skilled analysts with state-of-the-art technology to deliver unparalleled intelligence insights. Our team's deep domain knowledge is complemented by advanced AI and machine learning algorithms, ensuring accurate and relevant intelligence.

Cognitive Computing

Harnessing the power of AI and machine learning, we provide more accurate and reliable intelligence. Our algorithms learn from vast amounts of data, enabling them to identify insights that may go unnoticed by the naked eye. Gain confidence in your decision-making with precise and actionable intelligence.

Trend Analysis

Our RaaS offering implements advanced data analysis techniques to uncover hidden patterns and trends within complex datasets. We go beyond surface-level information, diving deep into data to extract meaningful insights that drive strategic advantage.

Operational Intelligence

We integrate cutting-edge sensor technology to streamline intelligence gathering and analysis processes. Leverage real-time data from diverse sources, including IoT devices, satellite imagery, and social media, to gain a comprehensive view of your operating environment.

Customisable

We understand that each client is unique, with specific needs and goals. RaaS provides customised intelligence solutions tailored to your requirements. From targeted market research to competitor analysis, we deliver insights that directly align with your strategic objectives.

Roke are Changing Worlds

Roke is a leading UK innovator in science and engineering. For over 60 years we've been improving the world through innovation, combining the physical and digital. We conceive, design and secure technically advanced data and communication systems for governments and industry.

Our deep knowledge of sensors, communications, cyber and AI means our 600+ engineers are uniquely placed to combine and apply these technologies to solve real world technical challenges and help deliver critical missions for our customers.

As a trusted partner, we welcome any problem, and are confident that our consulting, research, innovation and product development will keep people safe.
